

View of the card

Technical data

Fibers	<u>All type of fibers</u> : Natural, artificial or synthetics fibers The card is adapted to recycled fibers
Working width	1000 mm
Production speed	Up to 115 m/min
Basis weight	From 3 to 10 g/ meter. Our standard : 5 g/meter
Fiber length	From 15 to 80 mm
Drawing	Automatically done by the numerical tablet, depending on the basis weight
Cans	Cans of 1000 x 450 mm Max. 13Kg / can

Fiber preparation and carding equipment

Fiber preparation	Fibers are conducted to the card after blending and opening processes thanks to a new LAROCHE opening and blending unit.
Carding equipment (Rosique card)	<p><u>One Breast Roll</u> : Used to clean the raw materials and to separate more the fibers of recycled material. Associated to 5 carding groups : worker cylinders and stripper cylinders</p> <p><u>One main part</u> : Main Cylinder with toppings (trims) at the top</p> <p><u>Final roll</u> : Doffer at the end of the card</p>
